

EWDTS European Workplace Drug Testing Society

Proposal for the Registration and Batch Release testing of POCT-devices

9th EWDTS Symposium in Lisbon

• Wim Schielen

www.ewdts.org 29-5-2015, Lisbon An increasing number of POCT devices for the on-site detection of the use of alcohol or illicit drugs appear on

the market!

An increasing number of POCT devices for the on-site detection of the use of alcohol or illicit drugs appear on the market, are they.....

- Fit for purpose, eg fit for diagnostic procedures?

An increasing number of POCT devices for the on-site detection of the use of alcohol or illicit drugs appear on the market, are they.....

- Fit for purpose, eg fit for diagnostic procedures?
- Safe to use?
- Reliable?

An increasing number of POCT devices for the on-site detection of the use of alcohol or illicit drugs appear on the market, are they.....

- Fit for purpose, eg fit for diagnostic procedures?
- Safe to use?
- Reliable?
- Who says so? The producer? Independent validation?

An increasing number of POCT devices for the on-site detection of the use of alcohol or illicit drugs appear on the market!

- Who buys them? For what purpose?
- Based on what criteria? Quality, price, cut-off?
 Independently assessed?

An increasing number of POCT devices for the on-site detection of the use of alcohol or illicit drugs appear on the market!

- Who buys them? For what purpose?
- Based on what criteria? Quality, price, cut-off?
 Independently assessed?
- Quality of Instructions for Use?

An increasing number of POCT devices for the on-site detection of the use of alcohol or illicit drugs appear on the market!

- Who buys them? For what purpose?

The degree of inconvenience for the person who is subjected to a low-quality POCT device that produces a questionable result is....

Low? So, don't bother... you win some, you lose some!

Lisbon 2015

The degree of inconvenience for the person who is subjected to a low-quality POCT device that produces a questionable result is....

Low? So, don't bother... you win some, you lose some!

High? So, reputation-damage for both parties, or even a law suit, or a request for compensation! Bad press?

Suppose one would want a minimum set of quality indicators (Sp, Se, Re, Rb, etc.), how to get them?

- Producer?
- Independent assessment?
- Who decides on the minimum set of quality indicators?
- What levels for the quality indicators are acceptable?

Suppose one would want a minimum set of quality indicators (Sp, Se, Re, Rb, etc.), how to get them?

- Producer?
- Independent assessment?
- Who decides on the minimum set of quality indicators?
- What levels for the quality indicators are acceptable?

How is this done in other area's?

- Commercial sales
 - Registration/license (USDA/CFIA/FLI/ANSES...) + Batch Release testing

- Commercial sales
 - Registration/license (USDA/CFIA/FLI/ANSES...) + Batch Release testing
 - Notification (Validation Dossier + Technical Insert) + Registration elsewhere

More and more countries require an OIE registration and no specific national registration....

OIE is supra-national organization for control of animal disease – Organization International des Epizotes – World Organization for Animal Health, <u>www.oie.int</u>

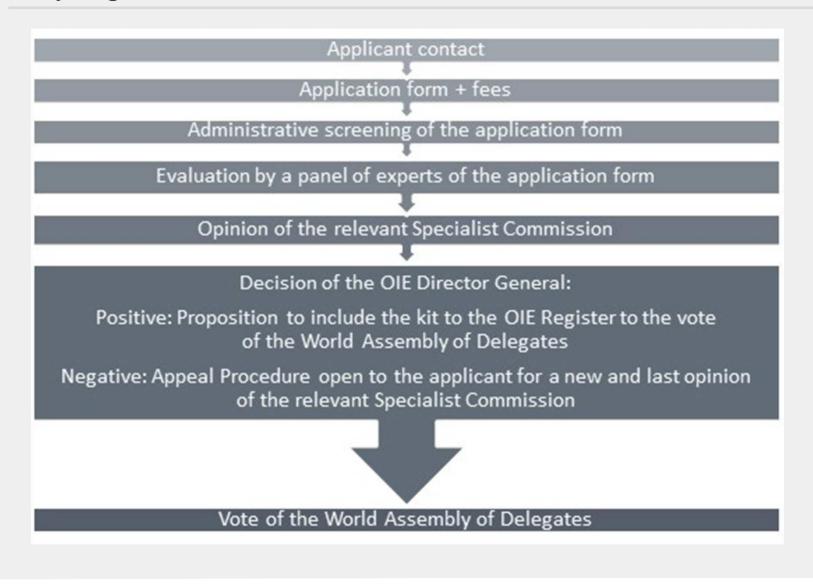

Registration at OIE is simple:

Why Registration of POCT devices?

Why Registration of POCT devices?

	Oie	
Ad Evalua		tion form
O Positive: Prop	Standard Operating	sion sister to the vote
Negative: Appeal	Procedure for OIE Registration of Diagnostic Kits Guide and Administrative Forms (2012)	new and last opinion
		es

Registration of POCT devices provides...

- Independent check of
 - Fitness for purpose
 - Sensitivity in respect to the Guidelines CO-values
 - Specificity for the screening group
 - Manufacturing QC
 - Shelf life studies
 - Correctness of claims in the Instructions for Use
 - Correct labelling of product and device

Registration of POCT devices provides...

- Independent check of
 - Fitness for purpose
 - Sensitivity in respect to the Guidelines CO-values
 - Specificity for the screening group
 - Manufacturing QC
 - Shelf life studies
 - Correctness of claims in the Instructions for Use
 - Correct labelling of product and device

→ POCT device fulfills basic set of requirements

Batch Release testing of POCT devices provides...

- Independent check of Commercial lots in respect to:
 - Consistency of production lots compared to original registered product
- Claims are met for listed devices

Database of released lots/shelf life on website

Batch Release testing of POCT devices provides...

- Independent check of Commercial lots in respect to:
 - Consistency of production lots compared to original registered product
- Claims are met for listed devices

Database of released lots/shelf life on website

Overview of POCT devices (lot) released for use in diagnostic procedures

Benefits of Device Registration and Batch Release testing of POCT devices?^{# 24}

- User knows that the POCT product is safe to use and meets minimum criteria for proper use in diagnostic procedures.
- Much less dispute if confirmatory test differs from POCT test
- Devices that are registered have a good starting point for sales

Benefits of Device Registration and Batch Release testing of POCT devices?^{#25}

How to organize this Device Registration?

How to organize this Device Registration?

EWDTS could install a committee to investigate the pros and cons of Device Registration and/or Batch Release testing.....
