

## **My Biography**

by **Andrea Bozzo**

Andrea Bozzo is a young Analytical Chemist. As a child he was fond of Science. Particularly while he attended high school he met the Chemistry and he understood what would have been his way.

Andrea has a Master's degree in Chemistry, at the University of Turin on December 14, 2015 with full marks (110 cum laude and mention). He has studied and done a lot of experience with analytical instrumentation and laboratory techniques, becoming familiar with chromatography, mass-spectrometry, spectrophotometry, electron-microscopy and many others.

He did his internship pre-degree at the laboratory "Centro Regionale Antidoping A. BERTINARIA. Here, he has carried out the thesis and the research concerning this submission. During this stimulating situation and in the previous experiences in different laboratories, Andrea has acquired useful technical skills in toxicological, clinical and analytical chemistry.

Recently he has finished the drafting about his thesis work and topic of this submission, for an upcoming publication.

After exciting years at the university, Andrea has become a young Analytical Chemist with a just past work experience in toxicological and environmental field and at the moment he works in pharmaceutical chemistry and he hopes to become also an expert in this carrier.
